Projects

Lyricfy

A web app created with Node, React, and Express. Users connect their Spotify account to get the Genius lyrics page of the song currently playing on the account. Users are authenticated using the Spotify API authorization code flow.

Face Detect

A single page application that uses the Clarifai API to detect and mark all the faces in a linked picture. Uses async functions to await Clarifai response. User authentication created in Node with Express and Bcrypt to hash passwords. Stored in PostgreSQL database.

Google Books

Search app consumes the Google Books API to search for books the user inputs. Results are mapped using custom styled components.

Education

Northwest Vista College/ Associate of Science in Computer Science

AUGUST 2019 - DECEMBER 2021, San Antonio
